

To whom it may concern,

I was first introduced to Action Sales in mid-2010. Our brand and concept were new and we experiencing rapid growth. My involvement with our brand has covered everything from operations to construction and with every phase of our development Action Sales has been right by our side. Carter, Danny and Peter have been instrumental in making our store opening process much smoother. They have even made the effort to be present during our franchise in-store training just to make sure they have a detailed understanding of what we're doing. Our company takes customer service very seriously and the fact that Action takes it just as seriously is a huge factor in our relationship. I have never encountered one employee at Action who does not make a profound effort to deliver the best customer service possible. To top it all off their pricing is extremely competitive which makes this such a great package deal for use. I look forward to many more years of working with the team at Action Sales.
